

Townline Elementary School
Title 1
Parental Involvement Policy

We, the Staff of Townline Elementary, in partnership with parents and the community, believe all children can learn. We will respect and value the uniqueness of each child and their family. Townline Elementary School has high expectations for student performance. We will assist each child in his/her success and maintain open lines of communication with students and parents on an ongoing basis. The Townline Staff believes that student success is a shared responsibility between parents and our school. All Townline Parents/ Guardians are encouraged to participate in all aspects of the school by working with the Parent-Teacher Council, attending Parent-Teacher conferences, voicing concerns, giving input to Townline Administrators, visiting classes, and communicating with teachers, counselors, and other staff as often as necessary.

Because Townline receives federal grant money, we are required to provide parents with a clear understanding of our expectations and services for your child. We have developed the following parent/ school contract to demonstrate our commitment to your child's success. It is a statement of intent by Staff, Students, and Parents/ Guardians to help each other achieve success for the children of Townline Elementary. We realize that children whose parents are active in their child's education perform better. Knowing this we are dedicated to providing opportunities for our parents that involve, staff, students and parents that will give valuable information regarding skills and resources to help the academic success of our students.

The staff recognizes the importance of a parent's involvement in the education of their child's education and we will present strategies and opportunities throughout the year. Parental input is welcomed, strongly encouraged, and will be requested for additional activities.
