# Study \& Homework Strategy: Understanding Teachers’ Expectations 

(adapted and revised from Study Strategies Made Easy)
Directions: Beneath each class period heading, write the course and teacher for each hour of your school day. Then, go down the list of descriptions and check the corresponding space next to every statement that applies to that class period.

## Teacher/Class

## Presentation of Information

1. Information written on board or overhead
2. Information presented in lecture and students take notes

## Homework Assignments

3. Assigned for practice only and no grade is given
4. Assigned and graded
5. Checked to see if done

## Questions on Tests Come From

6. Textbook chapters
7. Textbook questions
8. Teacher's lectures
9. Outside information
10. Worksheets/homework
11. Videos/labs

Now look over what you have checked. By looking at this chart, you can learn how to study for each teacher's unique needs. For instance,

- If the teacher lectures, use your notes to study because the information in your notes will be important.
- If homework is assigned and graded, do it well and on time in order to add points to your grade.
- Even if homework is not graded but meant for practice, do it because that information will likely come up again.
- If you know from where teachers get their test questions, concentrate more on those materials. For example, if a teacher always uses tests generated by the textbook company and never adds anything class-specific to the test, the test will be focused on the textbook.
- If a teacher doesn't review, you will have to conduct your own review. Pay close attention in class because daily lessons may include hints. If a teacher does review, study on your own anyway, but use the teacher's review to narrow down your final studying.
